“WORKING WITH ALEISTER CROWLEY’S THOTH TAROT DECK”

with Tarot Master

DEREK R. SEAGRIEF

A Masterpiece of Tarot

22 Keys to Self-Mastery – the Major Arcana or Keys 56 Minor Arcana or Small Keys

Today, there are probably about 500 Tarot decks available, the vast majority being created during the boom period of the 1970s.

And every year since 1969, when the first colour edition of Aleister Crowley's THOTH TAROT, appeared in bookstores worldwide, it has remained one the best-selling tarot decks in the world.

This is not surprising - in my opinion, it is quite simply the most stunningly beautiful deck of tarot cards ever created. It took the artist, the immensely talented Frida Harris, over 5 years (1938-43) to complete the 78-surrealistic masterpieces, working together with her mentor Aleister Crowley.

It combines the images and energies of East & West, ancient and modern philosophies, and brings together such diverse teachings as astrology, alchemy, freemasonry, numerology, magic, psychology, science & physics and the arts.

It has many ancient Egyptian images and references, which is inevitable given Crowley's inner source of guidance & inspiration.

At the dawn of a new millennium, Crowley wanted to produce a series of Tarot images that reflected the new world view, and not a mediaeval reproduction of Christian life philosophy.

He was, together with Arthur Waite, a member of the magical order of *The Golden Dawn*, in 19th. Century England, and when they published their two very different Tarot decks, it is primarily due to the influence of these two men, that the worldwide popularity of Tarot begun.

Crowley was essentially a Kabbalist and his magical viewpoint is to be found anchored in his Tarot masterpiece. "*The origin of the Tarot*", he wrote, "*lies in the Tree of life - and nowhere else*".

While it is true that only a small percentage of owners and users of the THOTH Tarot will ever fully appreciate the esoteric value of the cards - yet it is also abundantly clear to me that there are a great many people who would sincerely like to know more about them. If you find yourself in this group of Seekers - then this Online Training is for you.

THE BOOK OF THOTH

The Egyptian god THOTH, was regarded as the personification of wisdom, the very intellect of the Great God who formed the world. He was both Messenger and Teacher – yet *who was this being*, this immortal mortal who, according to ancient writers, was the author of 30,000 books?

Most authorities on the subject of Egyptian mysteries have taken it for granted that the Egyptian Thoth, whom the Greeks called Hermes, was an entirely mythological person – a god accumulated out of the tradition of centuries and finally accepted as the personification of all knowledge, especially the sciences and the arts.

It appears far more likely that Thoth-Hermes, was a living mortal who lived at some remote time and conferred unusual cultural benefits upon the people of Egypt.

So when Crowley names his Tarot deck – THE BOOK OF THOTH – he is making reference to the fact that the great Librarian of the Cosmos, the Keeper of the Akashic Records, THOTH or Hermes Trismegistus, (*Three Times Great Mercury*), can bring this knowledge into manifestation and pass it along to us.

Any Tarot deck to truly work must evoke deep archetypal response within us – and Crowley's THOTH deck succeeds everytime!
