Jupiter Senteret, Hestestien 1, N-1555 Son

- Life is speeding-up and we live in revelatory times where learning “to see” with our inner eyes is so important.
- Would you like to learn how to glimpse into the future & increase your intuitional powers?
- To “divine” is to ask questions to the invisible worlds, often about the future – and then to read the patterns that are formed – for this is the language of the gods.
- In the ancient Greek & Egyptian world, Prophecy, normally the gift of the Underworld deities, was gradually replaced by the Sun-gods, like Apollo or Horus, who then became the embodiment of far-reaching vision. “Seeing” therefore stretched all the way from deep below to far above – the entire spectrum of life.
- Divination for the ancient world meant to come into contact with the Will of the Gods, and was regarded as a divine science.
- The ancient Egyptians, who specialized in this technology of light, developed a special training to unfold this skill, calling it the “Eye of Light”. Some may refer to this as prediction, but in reality this is the power of “whole-seeing”. On this series of 6 Workshops, you will be exposed to the training that develops your EYE OF LIGHT.

Come & join us for a fascinating exploration of Divination, that includes the experience of Prediction & Prophecy, where you will learn how to increase your sensitivity to read signs, symbols & omens in simple, serious, fun & refreshing ways! Come and stimulate your inner eye and intuitive sensitivities for a wonderful series of Weekend Workshops of increased Light!
